WORK EXPERIENCE

Remote Seniro Ruby Engineer   May 2017 - Present
Freelance
Projects
• Xneelo - It is hosting provider in South Africa
• Team Size : 7
• Roles and Responsibilities : Backend Engineer
• Used Technologies :
• Server Side : Ruby 3.0.0, Rails 7.0.1, Sinatra
• Database : Postgresql
• Client Side : React
• Third Party API : Integration Amazon
• Web Server : Puma with Kubernetes/Docker
• Platform : Rancher, Kubernetes

- Pattern - It is a marketplace for ads and campaigns at Amazon. Works in different countries with Amazon. Deals with lots of data.
- Team Size : 7
- Roles and Responsibilities : Backend Lead
- Used Technologies :
- Server Side : Ruby 3.0.0, Rails 7.0.1
- Database : Postgresql and Snowflake
- Client Side : React
- Third Party API : Integration Amazon
- Web Server : Nginx with Puma docker
- Platform : AWS, dockers

- Rhino - Is a big insurance company in US, deals with renter insurances and integrated with different PMS's.
- Team Size : 20
- Roles and Responsibilities : Pod lead
- Used Technologies :
- Server Side : Ruby 3.0.0, Rails 7.0.1
- Database : Postgresql
- Client Side : React
- Third Party API : Integration with multiple PMS (Partner Management Systems like Yardi, etc)
- Web Server : Puma
- Platform : Heroku

- Value Added Services - It is based on content and mobile payments through mobile recharge or postpaid bills. It was combination of multiple micro services interlinked, complete app is decided in 3 sections, business rules, client facings and core data storage.
- Team Size : 6
- Roles and Responsibilities : Technical Lead Architect
- Used Technologies :
- Server Side : Ruby 3.0.0, Rails 7.0.1
- Database : Mysql
- Client Side : HTML, CSS, JS
- Third Party API : Integration with most of Mobile Operator gateway.
- Web Server : Nginx with Passenger
- Platform : Linode

- 800flower - It is a e-commerce product which ships flower bouquet and cakes in UAE, Qatar.Team Size : 15Role and Responsibilities : Lead Backend Developer
- Used Technologies :
- Server Side : Ruby 2.2.5, Rails 4.2, Solidus/Spree
- Database : Postgresql
- Client Side : HTML5, JQuery, CSS
- Third Party API : Paypal, Mailchimp, Mandrill, UrbanBuz.
- Web Server : Puma
- Platform : Heroku

Mobile Content - It is a Value Added Services Domain project based on Mobile payments and content delivery, live across world mainly at Europe & UK
- Team Size : 6Role and Responsibilities : Lead Backend Developer
- Used Technologies :
- Server Side : Ruby 2.4.4, Rails 4.2
- Database : Persona Mysql
- Client Side : HTML5, JQuery, CSS
- Third Party API : Mobile Opertor and Payment Gateways for different countries
- Web Server : Nginx with PassengerDeployment : Capistrano and Anible

• Platform : Linode

• HelpfulCrowd - It is a Review collection app, works on Shopify, Ecwid, Squarespace, Woocommerce

• Team Size : 4
• Role and Responsibilities : Lead Backend Developer
• Used Technologies :
• Server Side : Ruby 2.6.1, Rails 5.2, Solidus/Spree
• Database : Postgresql
• Client Side : HTML5, JQuery, CSS
• Third Party API : Chargebee and Shopify Gateway
• Web Server : Puma
• Platform : Heroku

Senior Software Engineer   Jun 2014 - May 2017
Weboniselab pvt ltd
Projects
• DataMapper - It is combination of Rails & Java. Rails side is used to manage user portal, billing, surveys data display & store on cloud. And Java side is responsible to process data captured by DRONES. This application basically used to manage your aerial data. DataMapper is a cloud based application that allows you to upload store, process and share your aerial data easier and more cost effectively than ever before. https://www.datamapper.com/
  • Team Size : 15
  • Role and Responsibilities : Developer
  • Used Technologies :
  • Server Side : Ruby 1.9.3, Rails 3.2.17
  • Database : MySql 5.5
  • Client Side : HTML5, JQuery, CSS
  • Third Party API : AWS SDK.
  • Web Server : Nginx, Passenger
  • Platform : Ubuntu 12.04

• Fabrily - Fabrily makes it easy to create custom T-shirts and to sell them to your network with no costs, risks or hassle.
